

What's New in PurchaseManager 4.0.0

User access and spend levels.

Version 4 has various user access levels:-

- **View only** users can simply view orders, they cannot edit or place order.
- **Add Only** users can input orders, however they cannot place or edit.
- **Restricted** allows user can place orders to your defined 'spend limit'.
- **Unrestricted** users can place orders to any value.

Define units for order items.

You can now define units for items, such as feet, inches, metres, cubic feet, cubic metres, tonnes, etc.. Decimal quantities are now enabled.

Mark off part deliveries.

When quantities delivered are different from that ordered, you can now mark off the amounts delivered.

Parts/items no longer dedicated to single supplier.

You can now order and request quotes from one supplier for items that are normally supplied by another.

General improvements.

Version 4 is now fully Vista compatible. Much of the program has been re-worked and the input screens simplified. The right portion of the main interface now summarises the product quantities ordered, allowing you to see the quantities you are ordering. You can try new version 4.0.0.
